

Tips to Improve Your Data Visualizations

Christopher Kinson, PhD

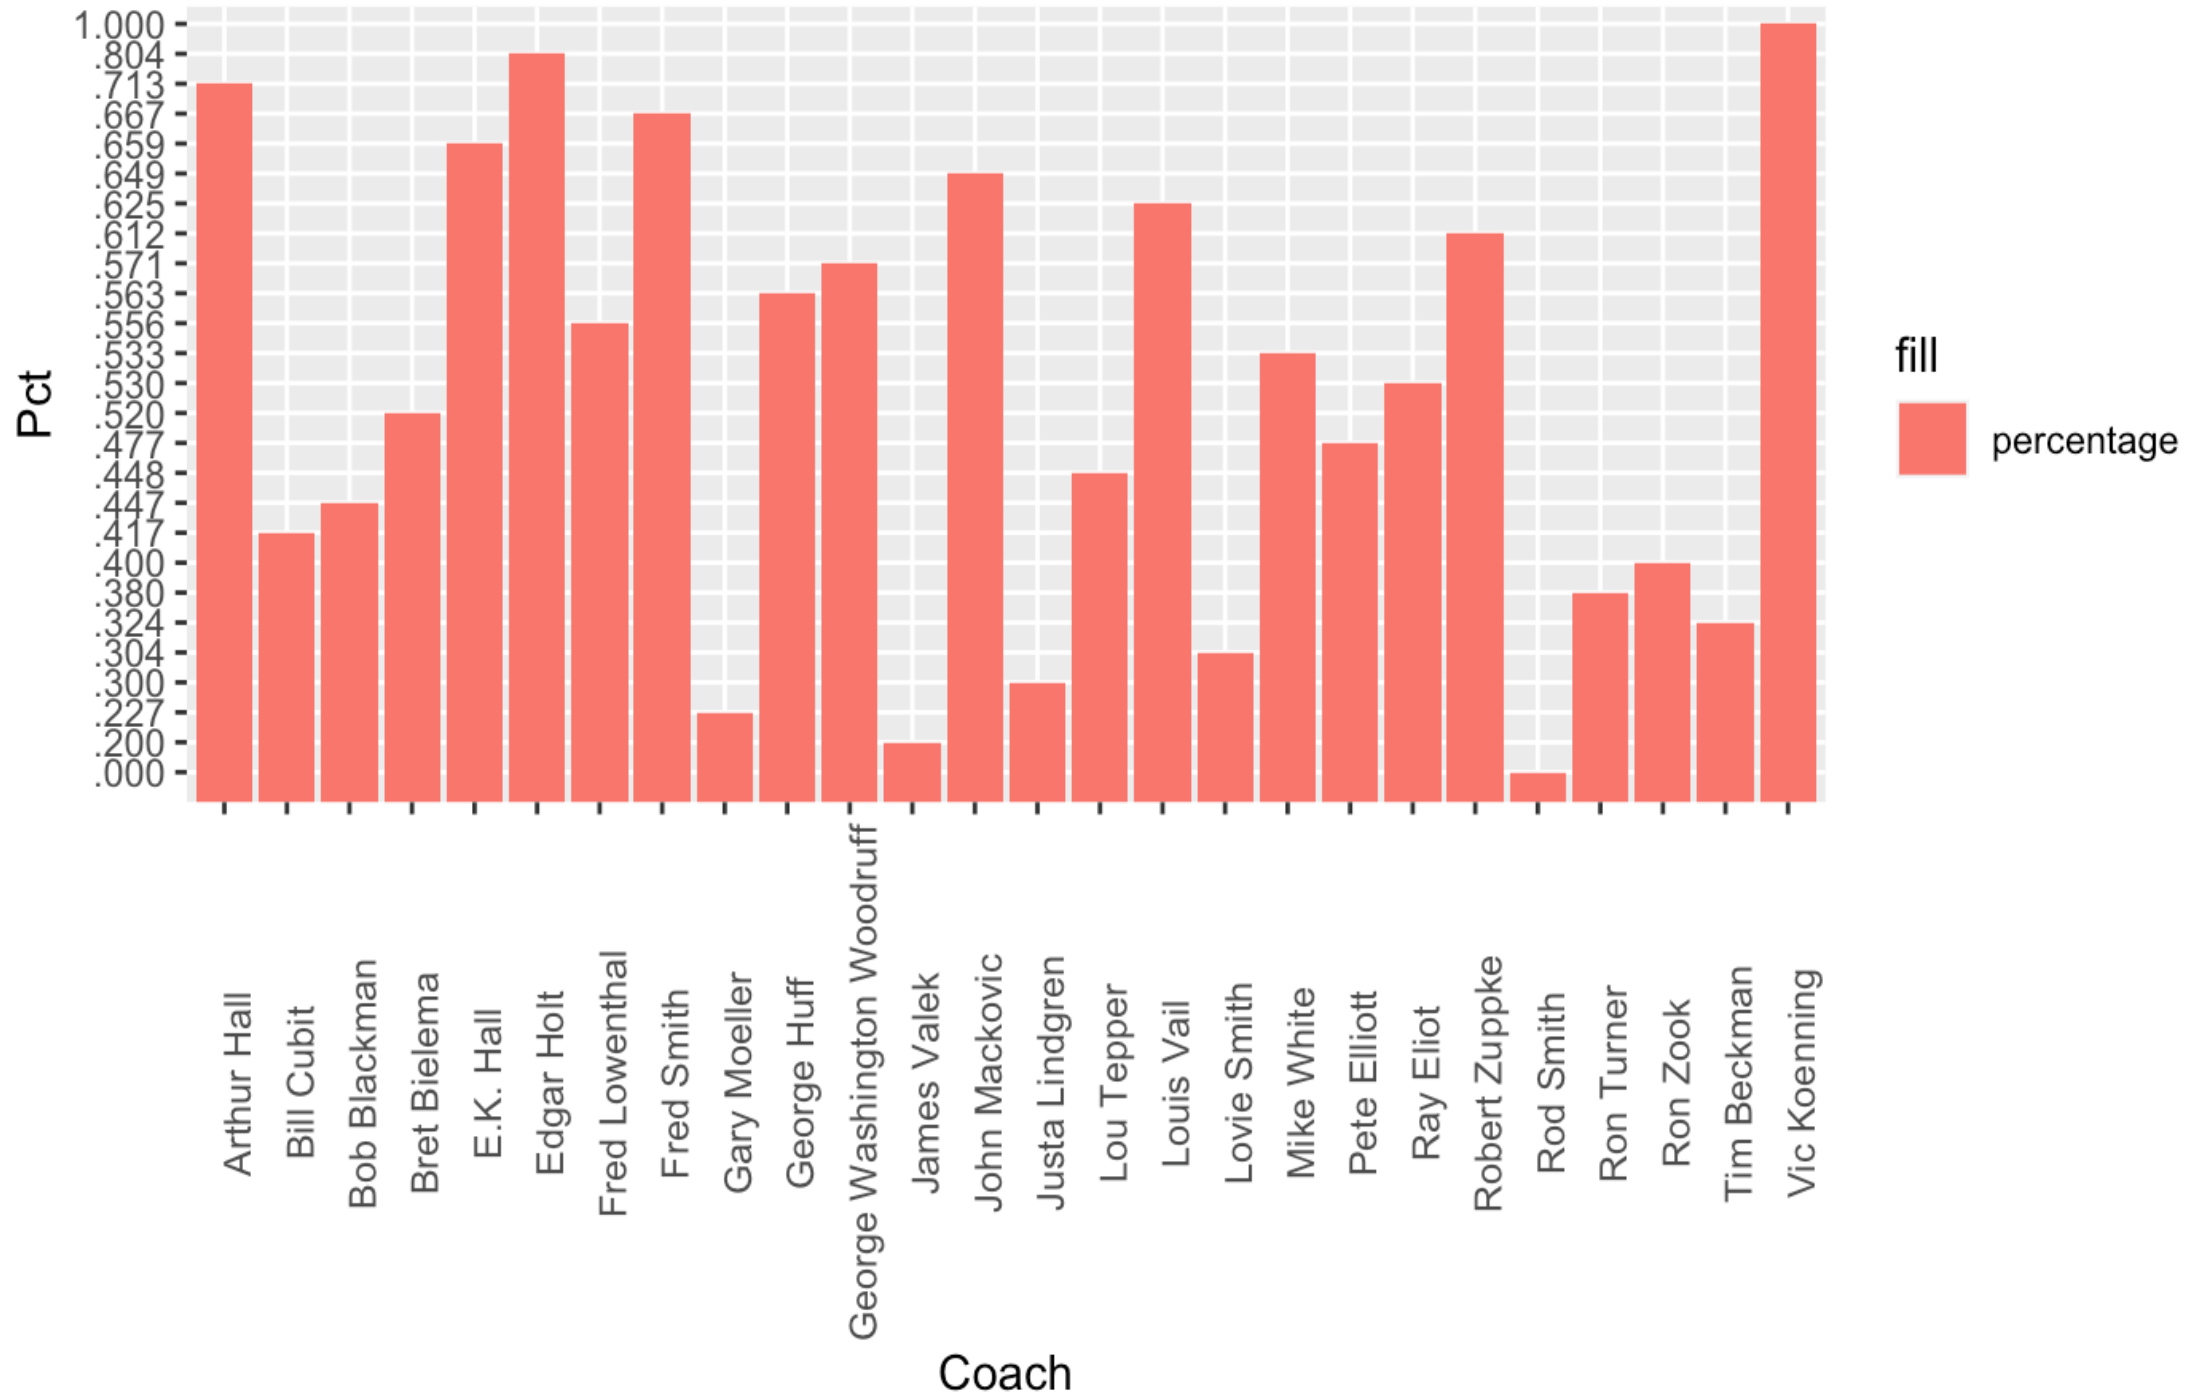

What jumps out and what do you notice first?

Tip: Use lines for displaying time information.

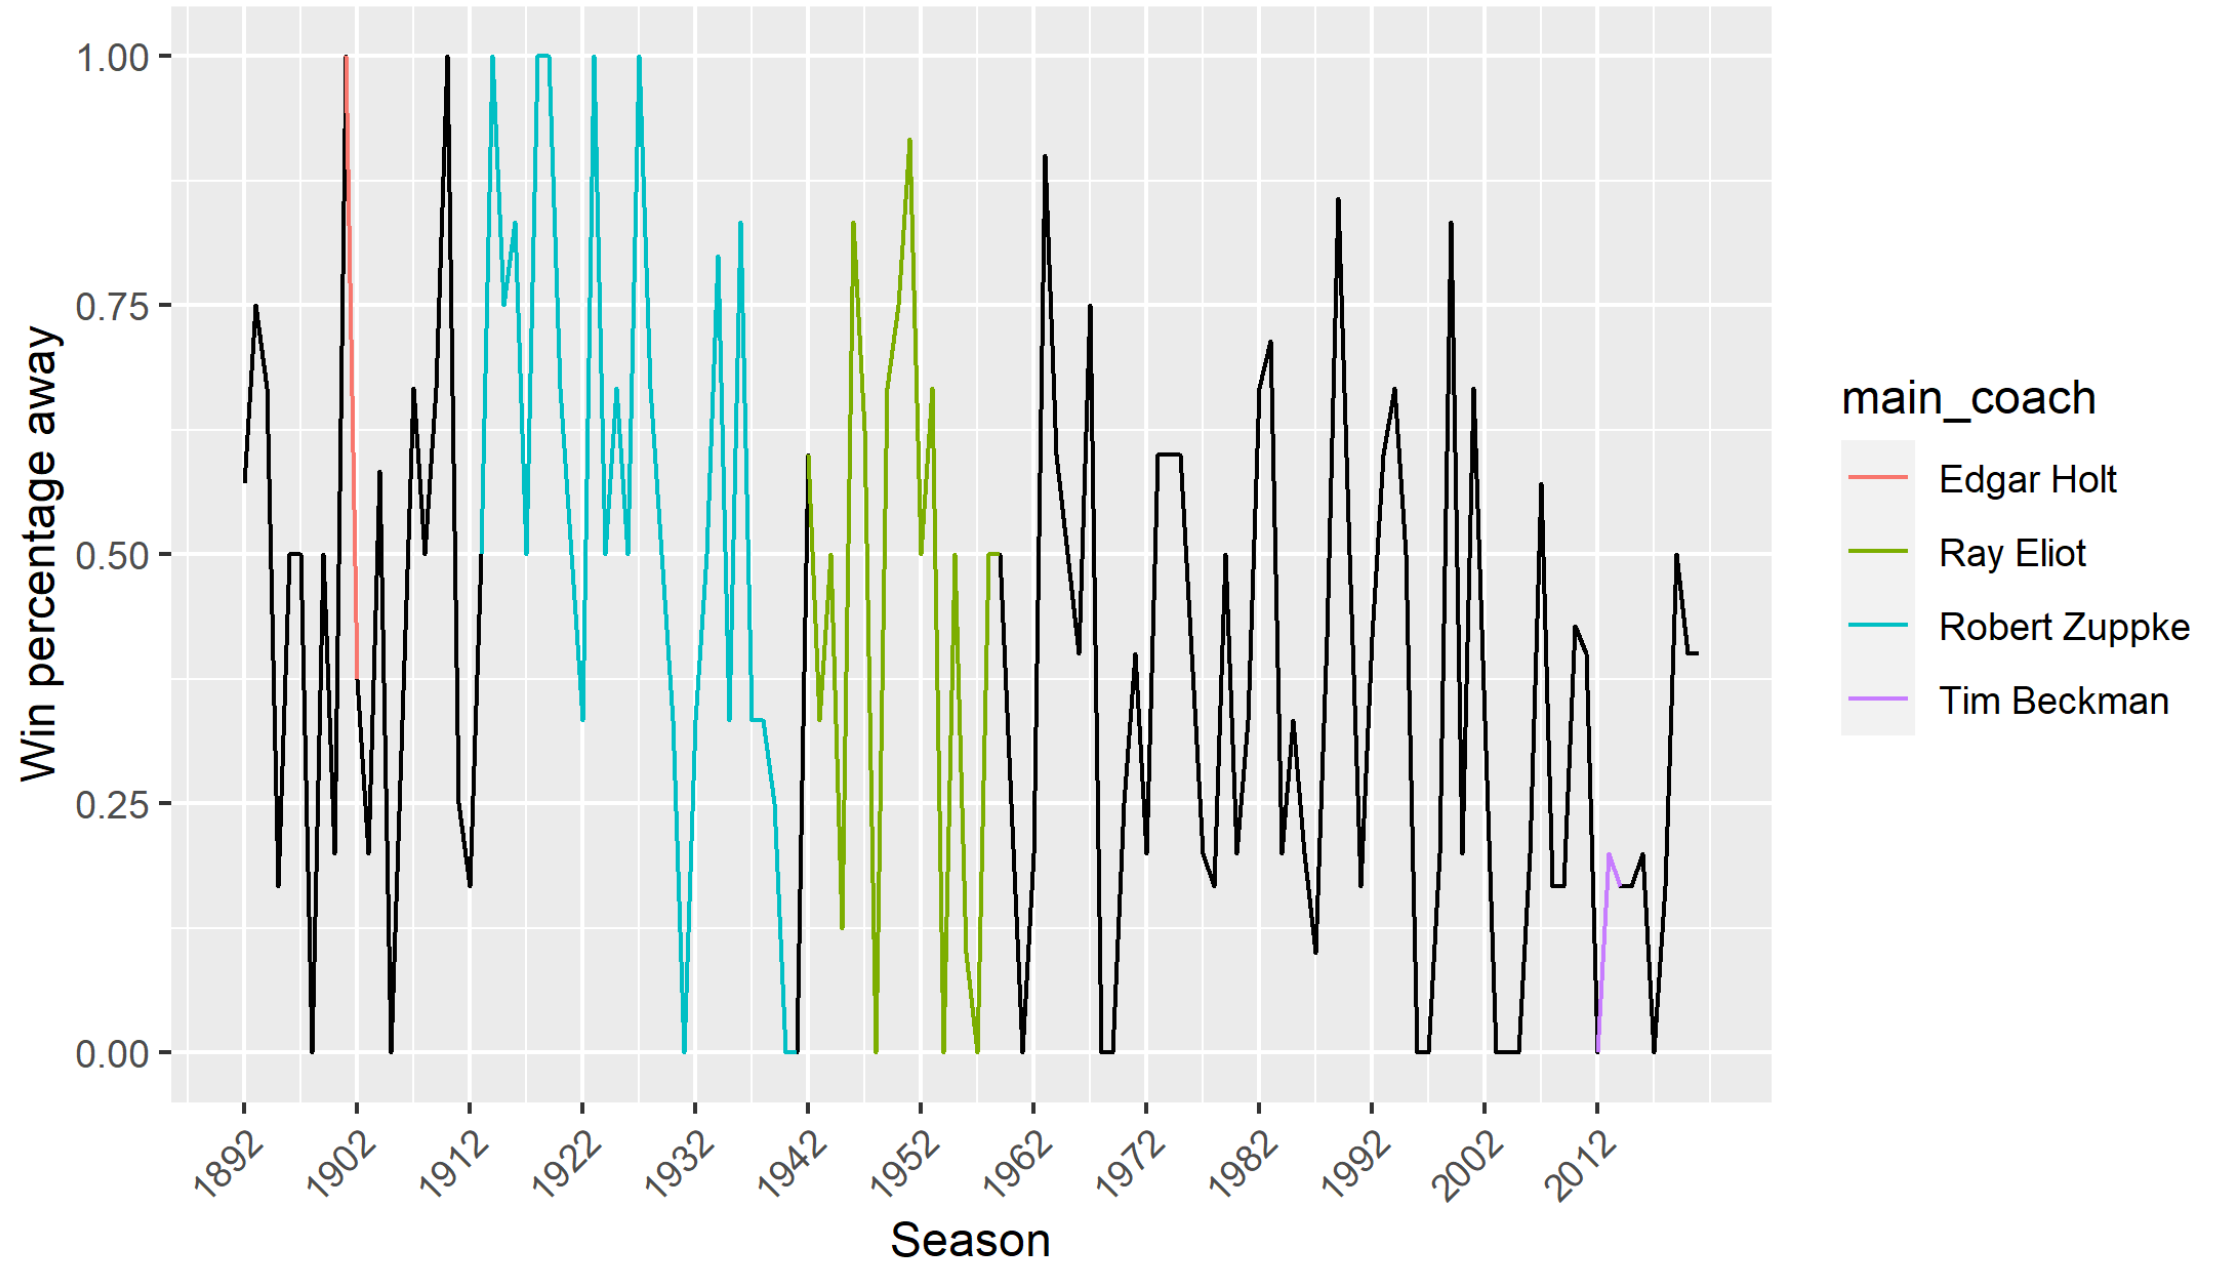

Illinois in Big10

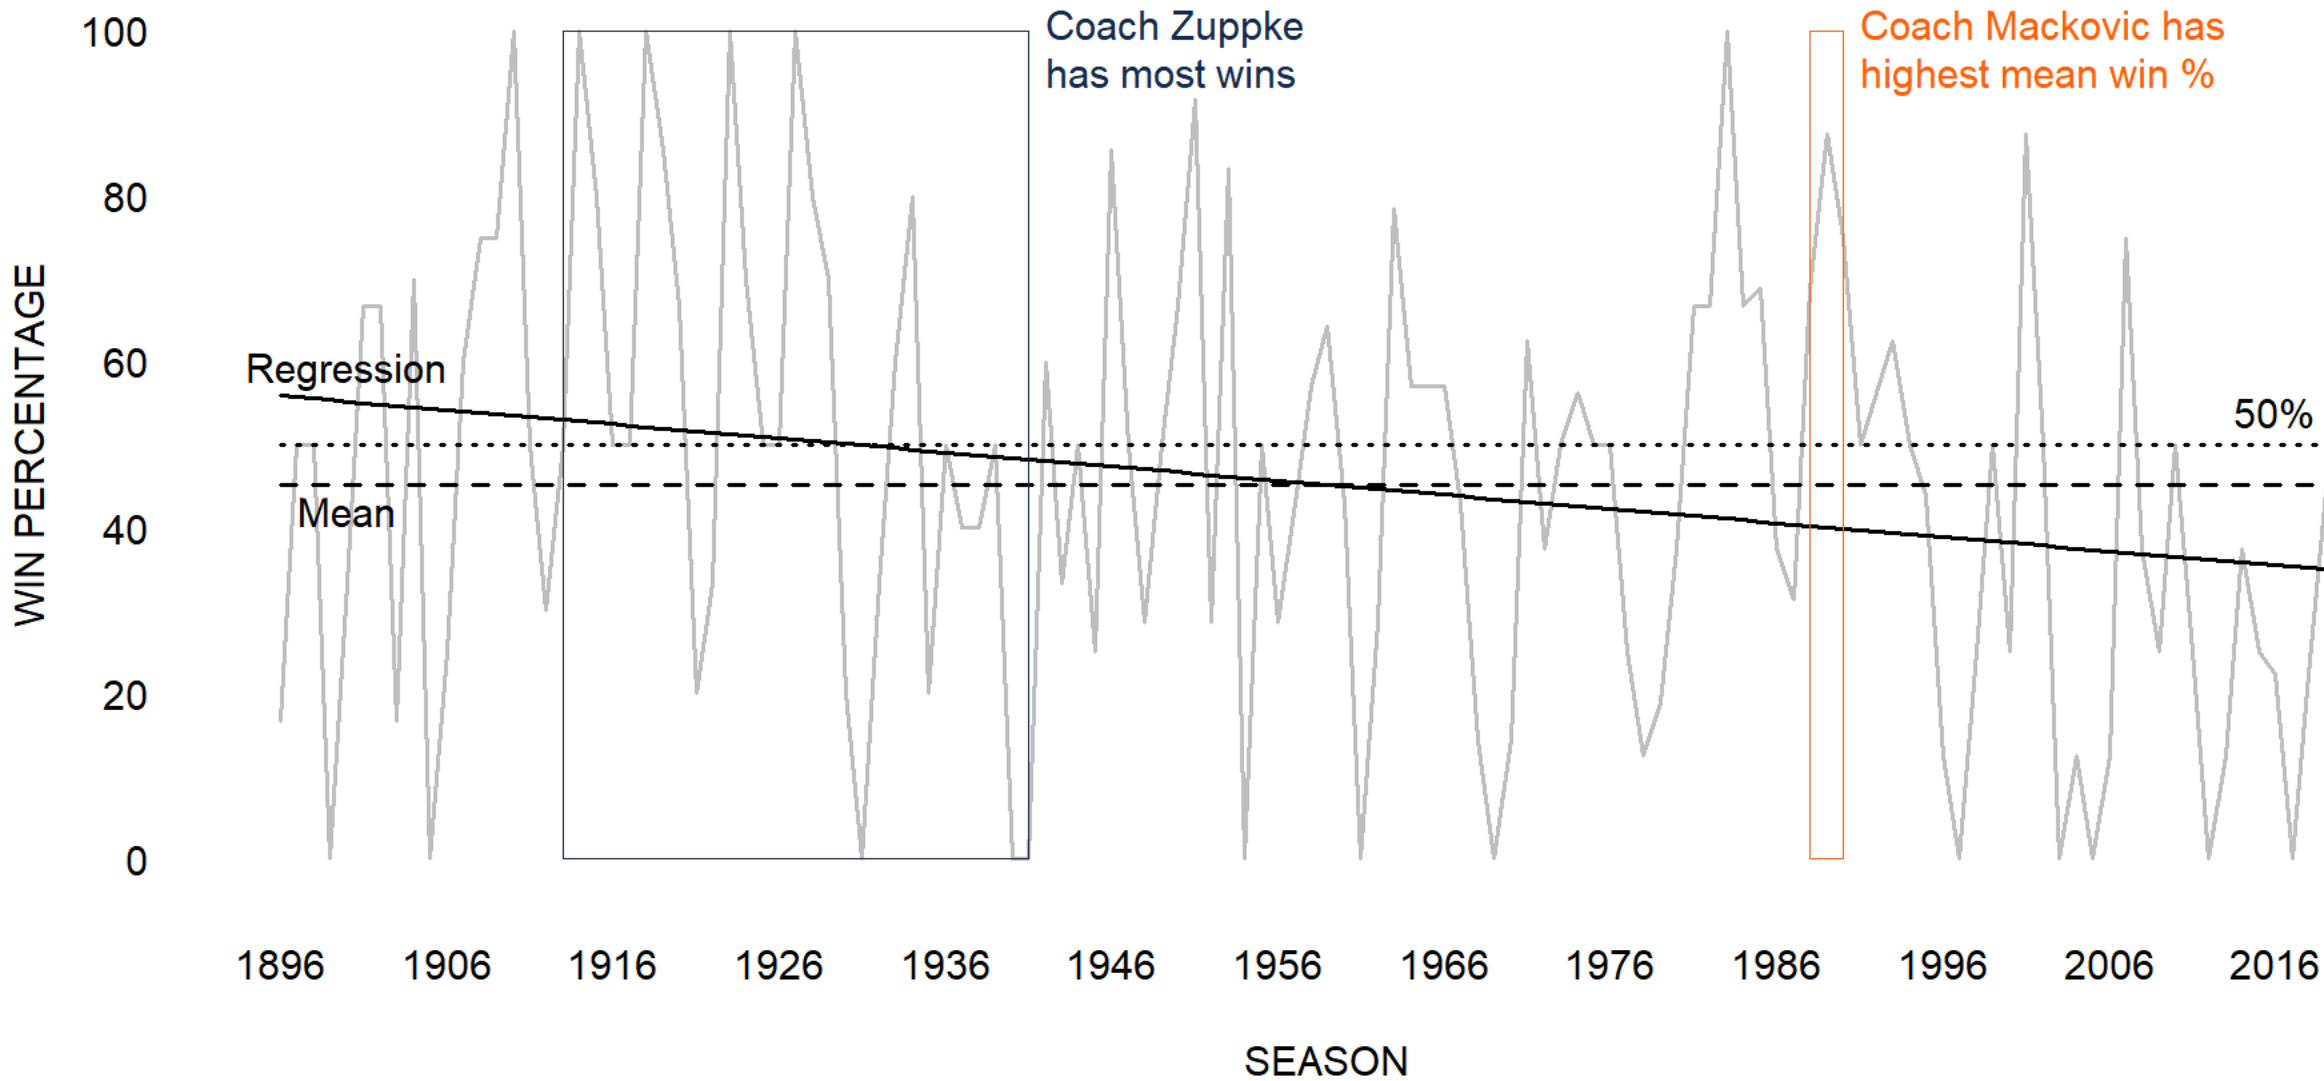

Tip: Leverage data variables
when they are related to time.

Win Percentage Away by Year

Illini Football In-Conference Games

Base R

- Create basic line plot with no axes
`plot(..., type="l", axes=FALSE)`
- To add custom axis
`axis()`
- To add lines beyond base plot:
`lines()` ; `abline()`
- To add enclosures
`rect()`
- To add text
`text()`

Tidyverse

- Create basic line plot with no axes
`geom_line(mapping=aes())`
- To add custom axis
`scale_x_*` ; `scale_y_*`
- To add lines beyond base plot
`geom_line()` ; `geom_smooth()`
- To add enclosures
`annotate("rect")`
- To add text
`annotate("text")`

Tip: Use color for emphasis.

Number of Incidents Involving the Urbana Police

Base R

- To begin plot with blank canvas

```
plot(..., axes=FALSE, type="n", xlab="", ylab="", main="")
```

- To add RGB-specific color to main plotting characters

```
plot(..., col=rgb())
```

- To add custom horizontal axis label in left-most position

```
title(xlab="", adj=0)
```

Tidyverse

- To begin plot with blank canvas

```
theme(panel.background=element_blank(), legend.position="none")
```

- To add RGB-specific color to main plotting characters

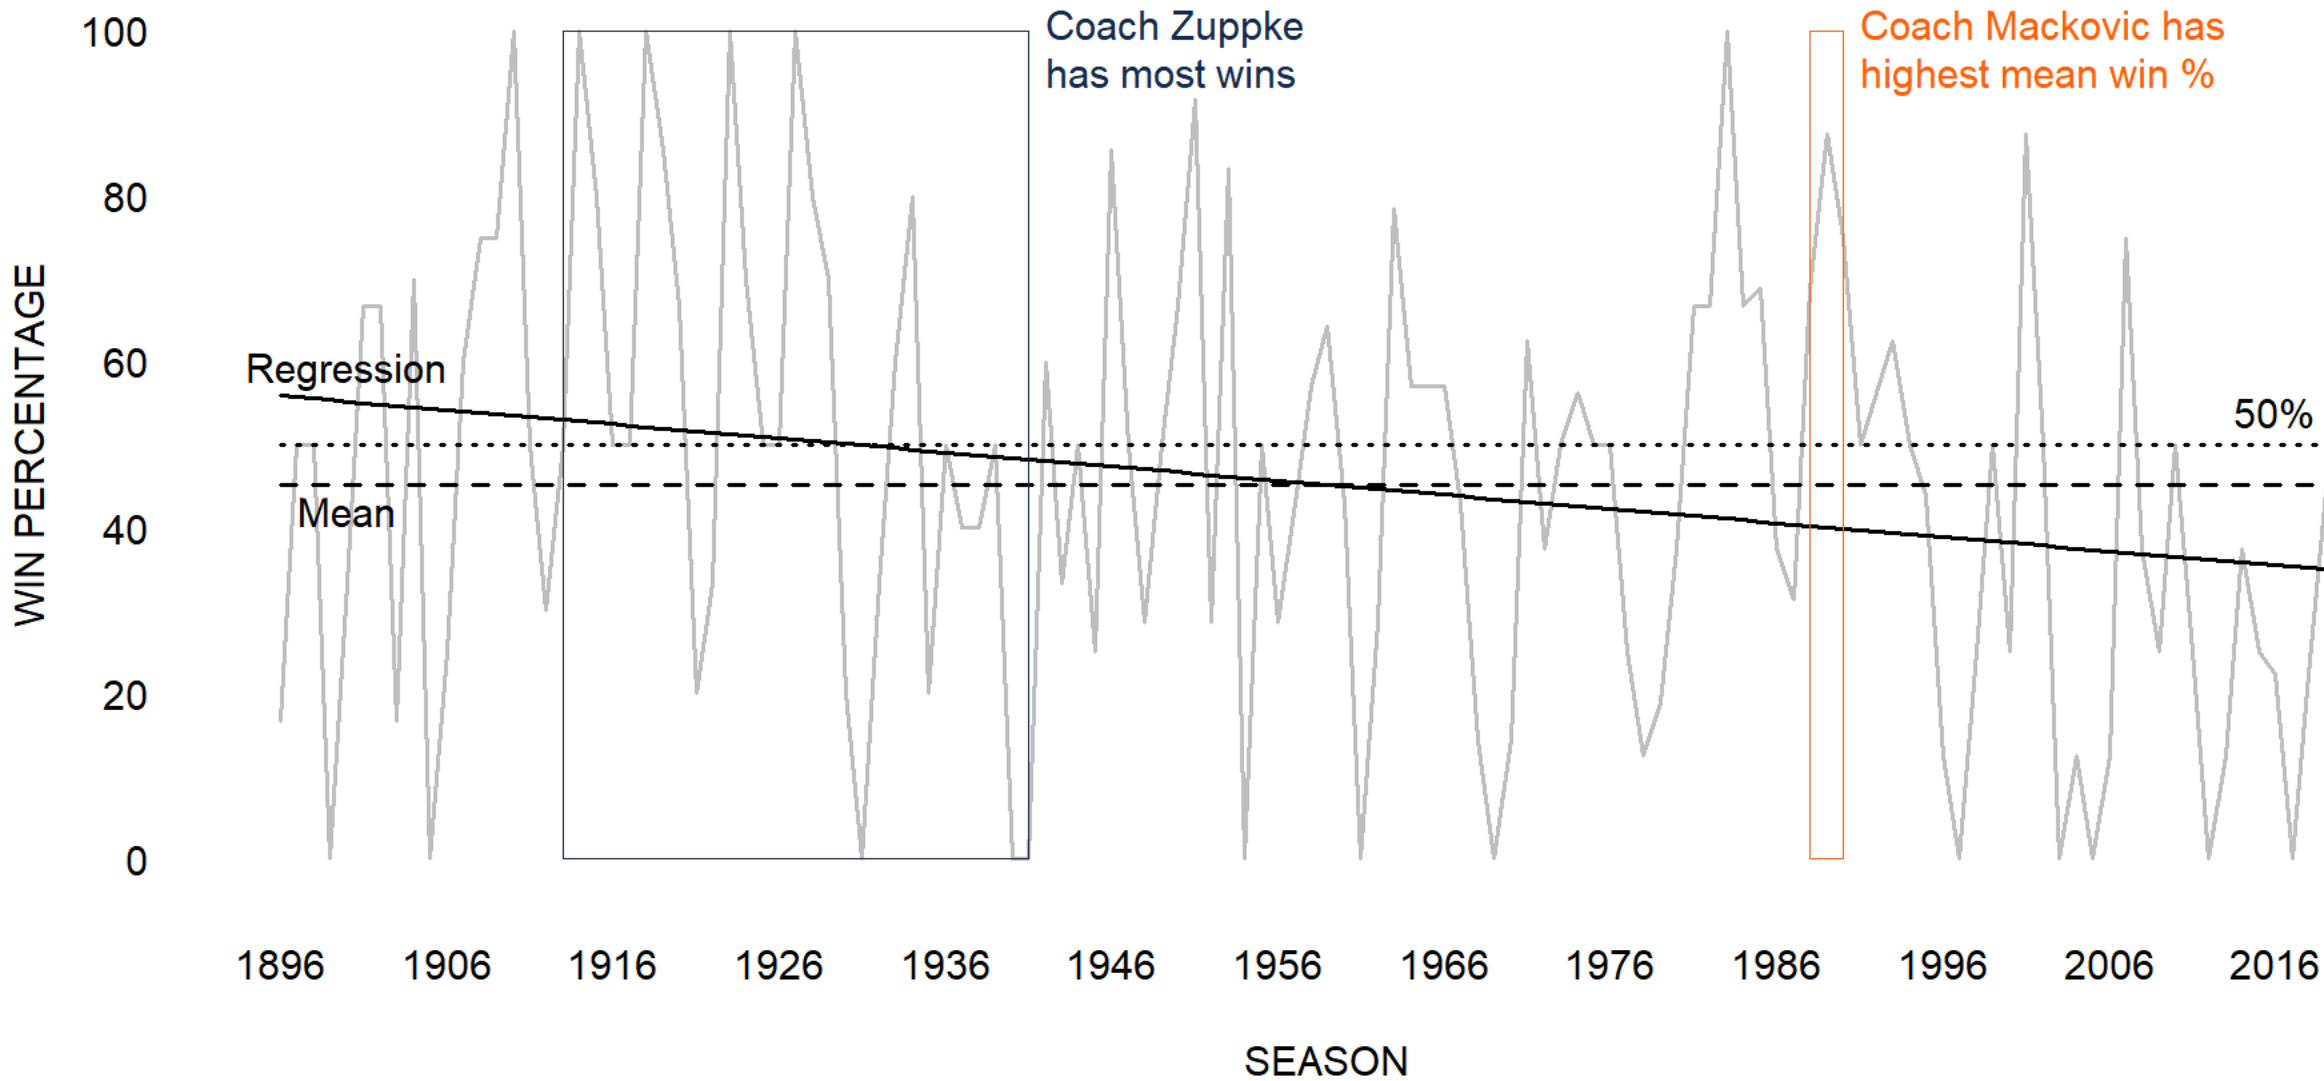

```
ggplot(..., color=rgb())
```

- To add custom horizontal axis label in left-most position

```
theme(axis.title.x=element_text(margin=margin(l=)))
```

Tips: Check color wheels, such as www.canva.com/colors/color-wheel/, for complementary colors. When color is in the branding, use it.

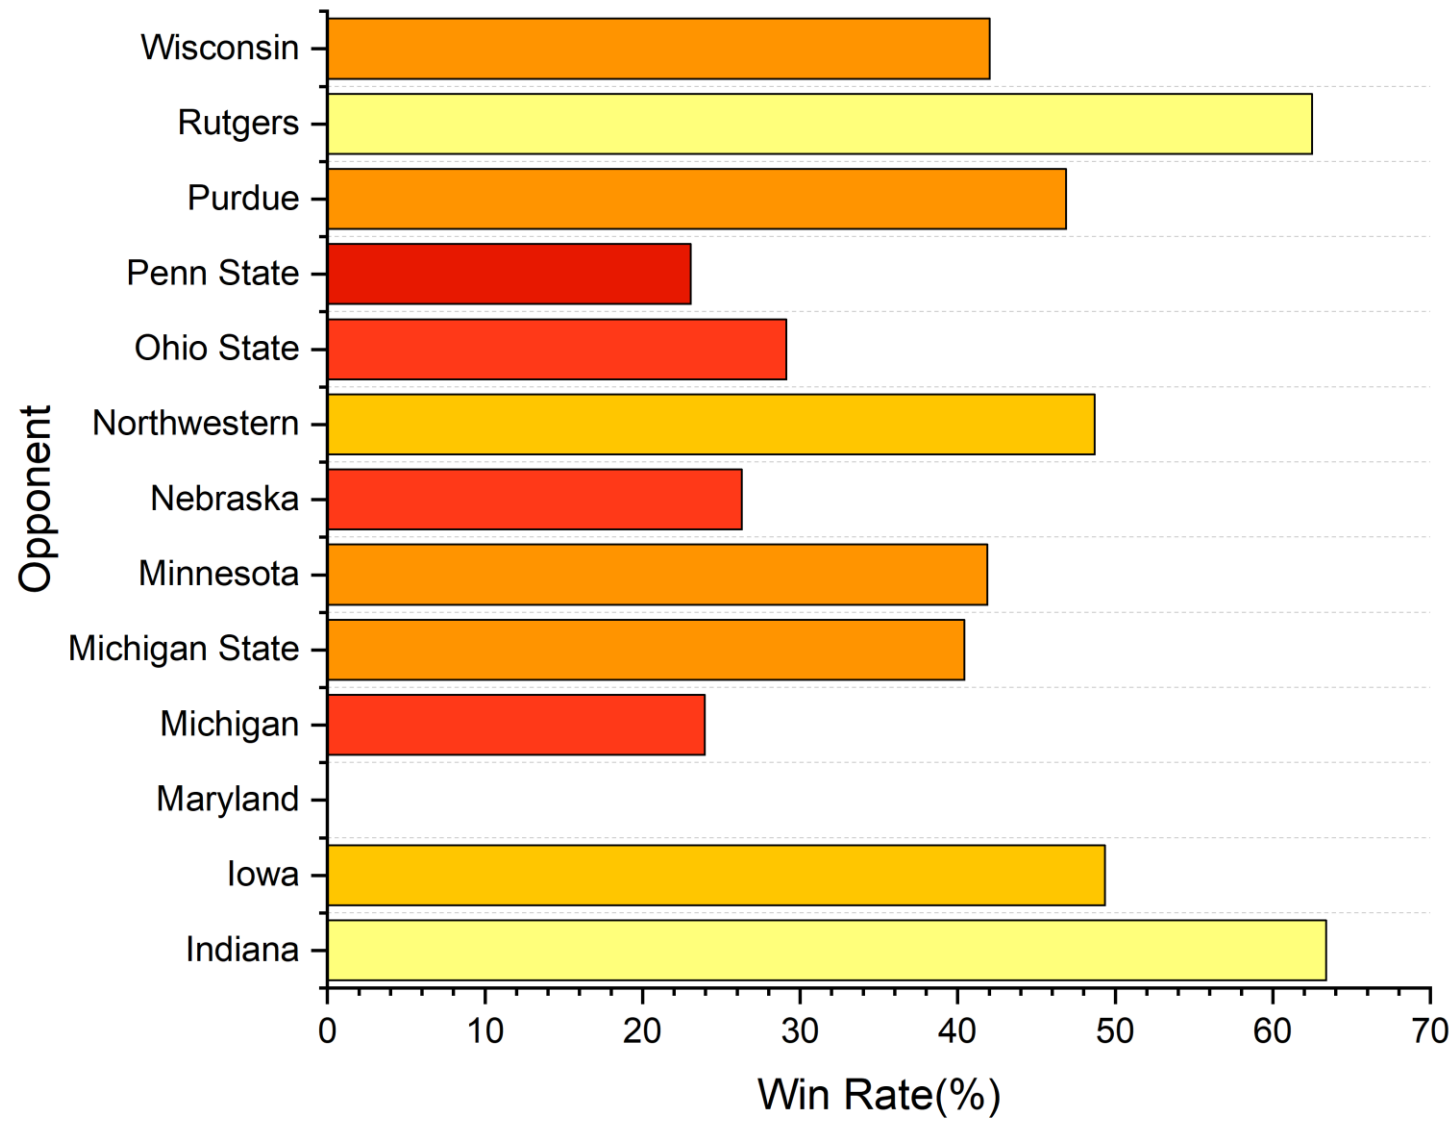

Illini Football In-Conference Games

<https://marketing.illinois.edu/visual-identity/color>

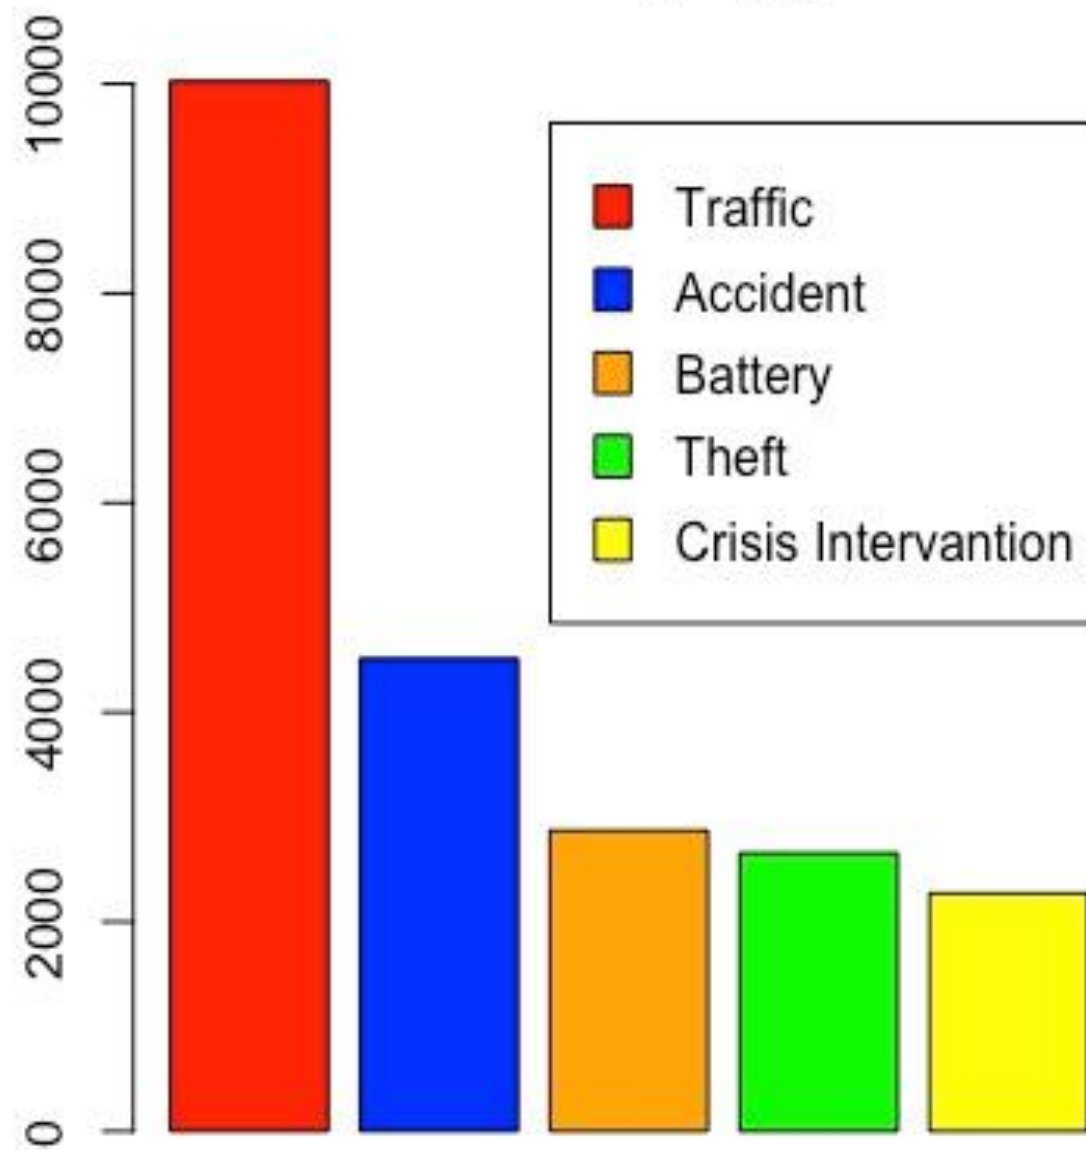

Tips: Don't overload the audience.
Your data viz should be self-sufficient with a clear context.

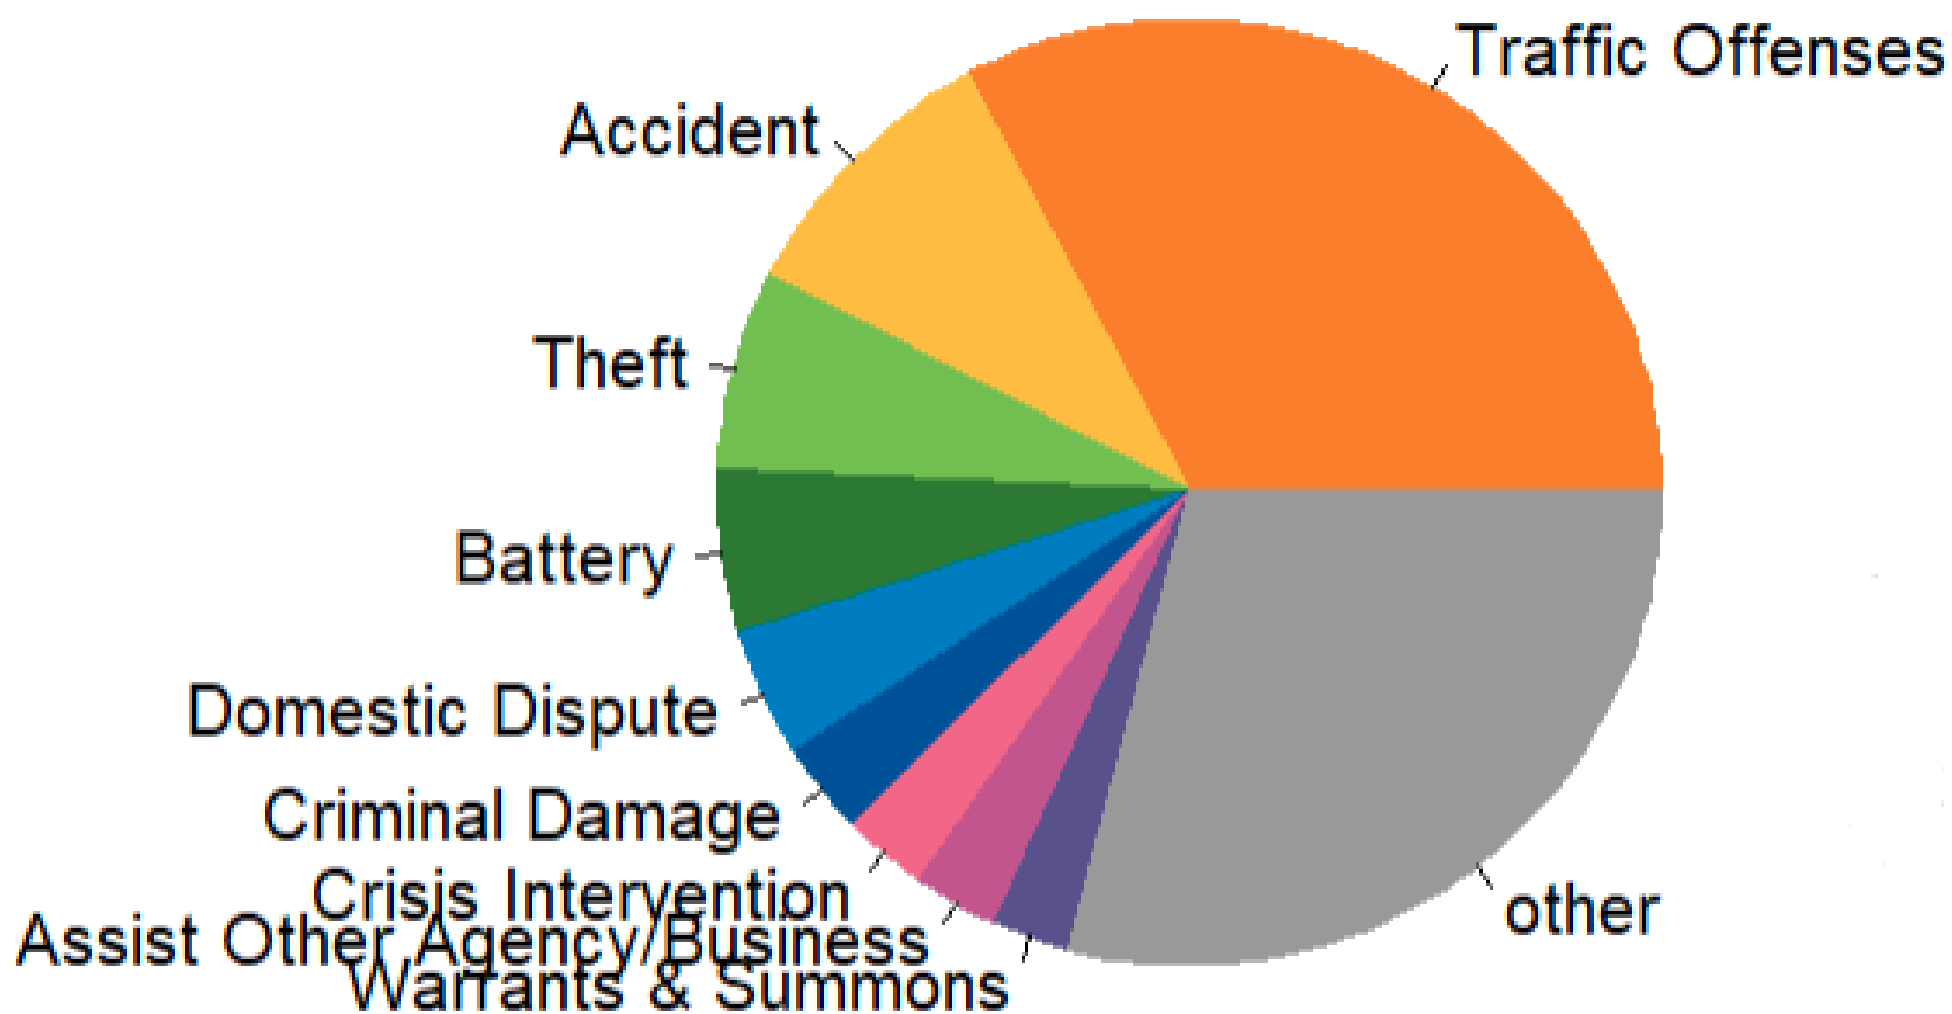

Tip: Use bars to represent counts.

Crime category plot

Top 5 Most Common Crime Categories for Urbana Police during 1988-2022

Base R

- To begin with bar plot

`barplot()`

- To remove names of bars

`barplot(..., names.arg="")`

- To create horizontal bars

`barplot(..., horiz=TRUE)`

Tidyverse

- To begin with bar plot

`geom_col()` ; `geom_bar()`

- To remove names of bars

`theme(axis.text.x=`
`element_blank(),`
`axis.ticks.x=`
`element_blank())`

- To create horizontal bars

`coord_flip()`

Tip: Space, size, and shape can be used to emphasize and focus the audience's attention.

Number of Incidents Involving the Urbana Police

Top 5 Most Common Crime Categories for Urbana Police during 1988-2022

Base R

The following are arguments within either the `plot()` or `text()` functions.

- To change plotting character shape

`pch=`

- To change plotting character size

`lwd=`

- To change text size

`cex=`

- To change text orientation

`las=`

Tidyverse

The following are arguments within either `ggplot()` or `theme()` functions.

- To change plotting character shape

`shape=`

- To change plotting character size

`size=`

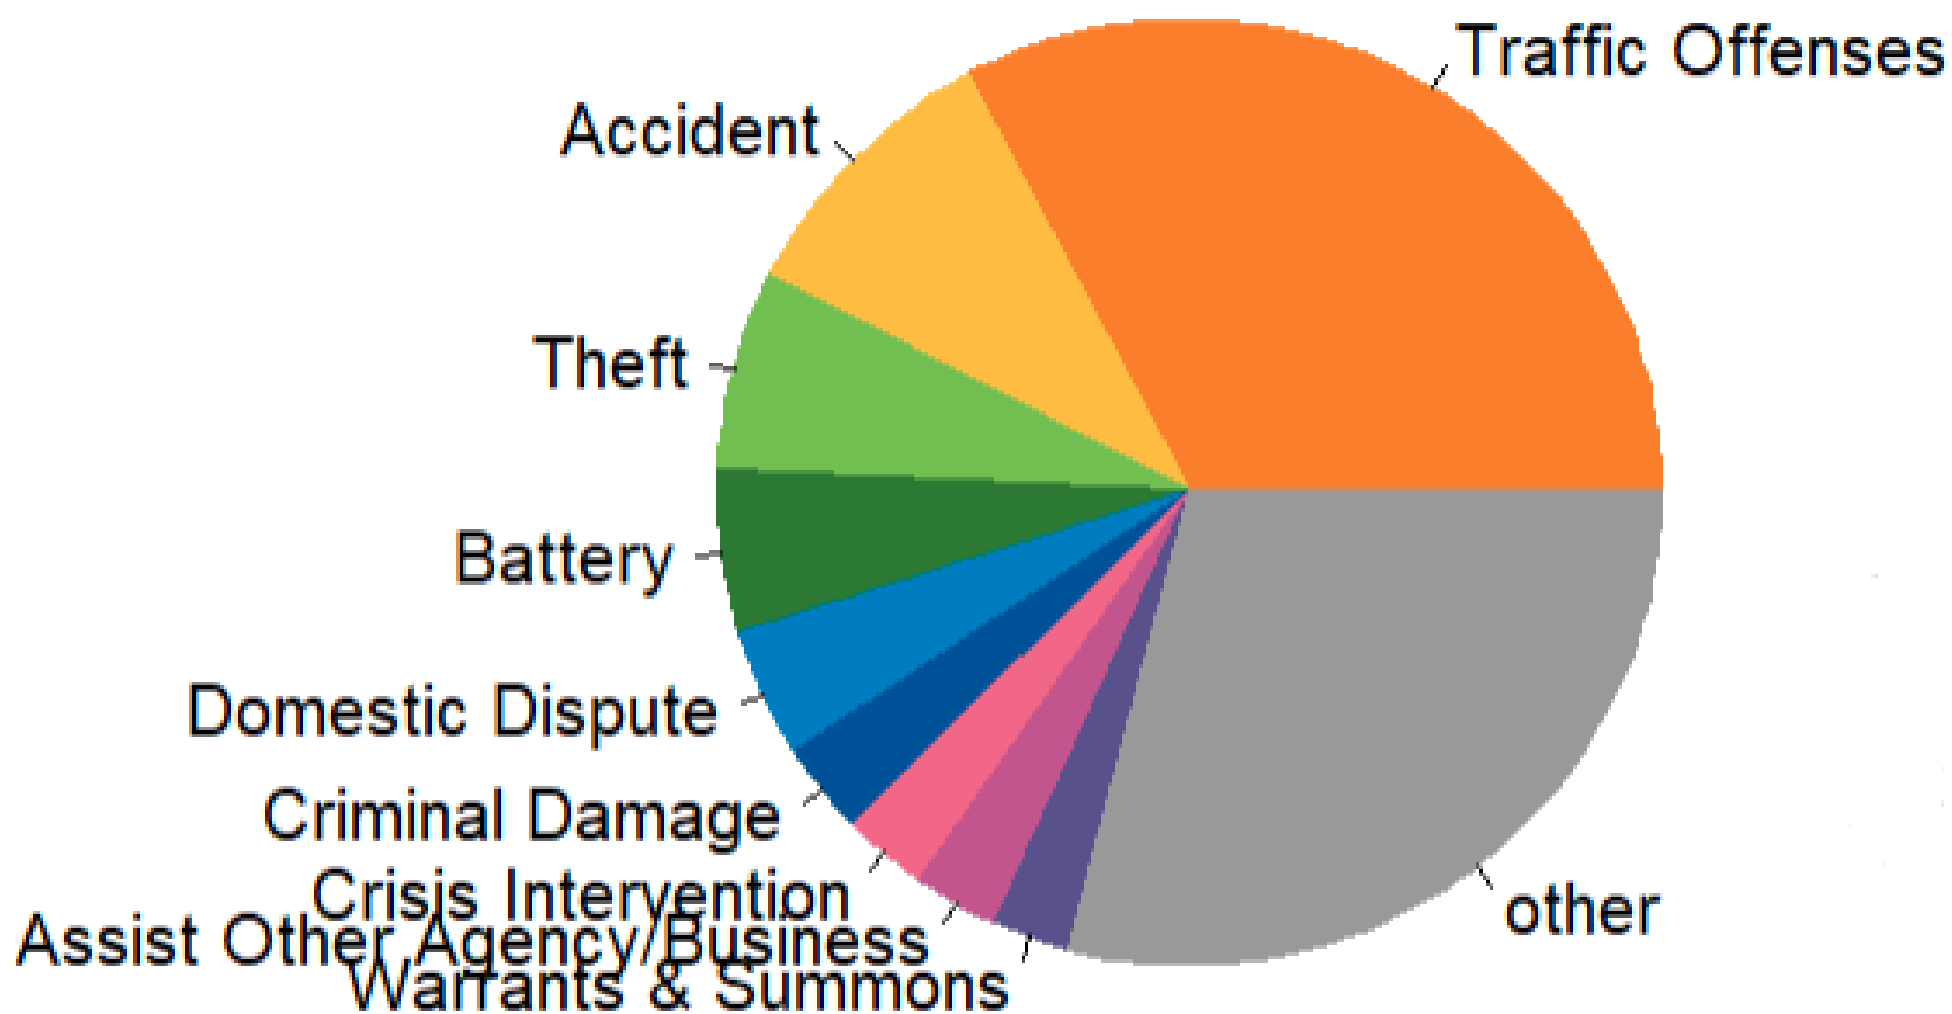

- To change text size

`element_text(size=)`

- To change text orientation

`angle=`

Tip: Do not display screen shots.

data-viz-improvements.R ✕

Save as Image...

Save as PDF...

Copy to Clipboard...

Base R

- To save a plot as an image with .png extension

```
png("plot_name.png")
```

- To save a plot as an image with .pdf extension

```
pdf("plot_name.pdf")
```

- To save a plot as an image with .jpeg extension

```
jpeg("plot_name.jpg")
```

- To close the graphics device

```
dev.off()
```

Tidyverse

- To save a plot as an image with .png extension

```
ggsave("plot_name.png")
```

- To save a plot as an image with .pdf extension

```
ggsave("plot_name.pdf")
```

- To save a plot as an image with .jpeg extension

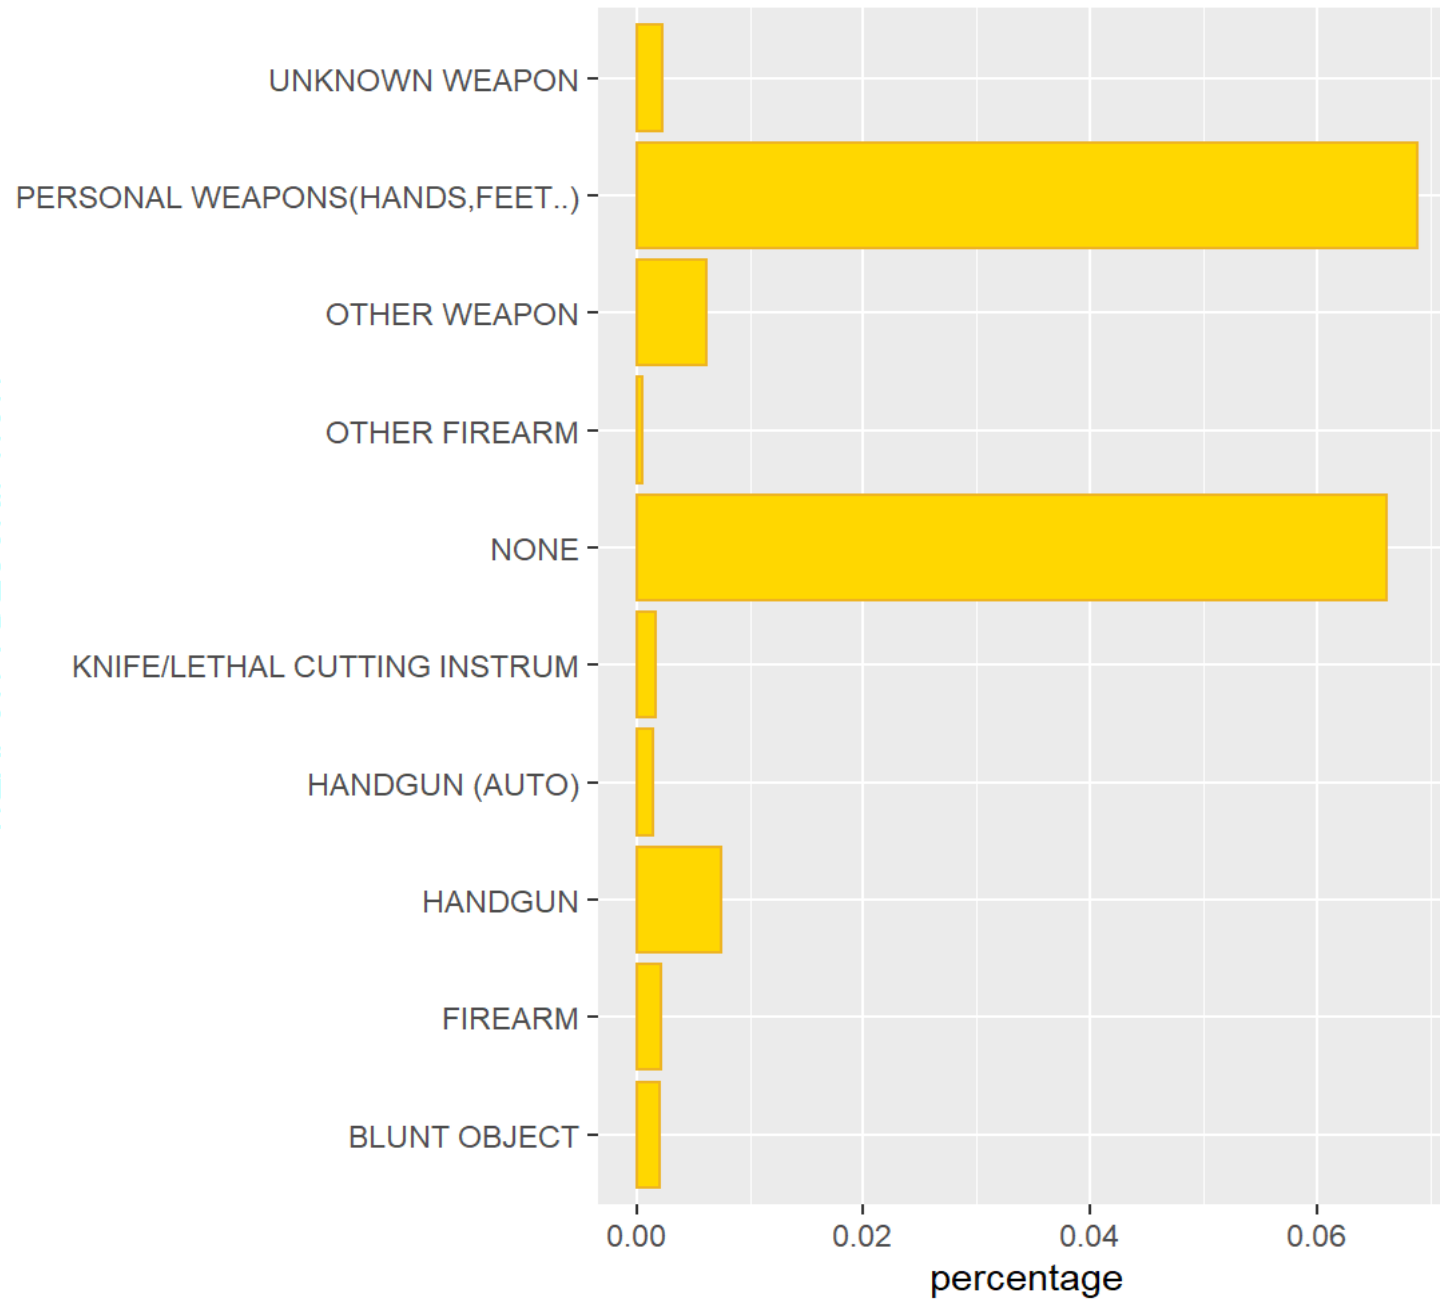

```
ggsave("plot_name.jpg")
```

Tip: Employ visual hierarchy, which includes removing clutter and using pre-attentive attributes such as size, shape, and color.
